	Database Identifiers	GENEPIO:0001122							
				Store the collector sample ID. If this number is considered identifiable information, provide an alternative ID. Be sure to store the key that maps between the original and alternative IDs for traceability and follow up if necessary. Every collector sample ID from a single submitter must be unique. It can have any format, but we					
Database identifiers	specimen_collector_sample_ID	GENEPIO:0001123	The user-defined name for the sample.	suggest that you make it concise, unique and consistent within your lab.	ASDFG123		1.0.0	1.0.0	1.0.0
Database identifiers	specimen_collector_subsample_ID	GENEPIO:0100752	The user-defined identifier assigned to a portion of the original sample.	Store the ID for the subsample/aliquot.	ASDFG123_12		1.0.0	1.0.0	1.0.0
Database identifiers	pooled_sample_ID	GENEPIO:0100996	The user-defined identifier assigned to a combined (pooled) set of samples.	If the sample being analyzed is the result of pooling individual samples, rename the pooled sample with a new identifier. Store the pooled sample ID.	12345AYZ		1.0.0	1.0.0	1.0.0
			The user-defined identifier assigned to a specific location from which	Store the ID for the site from which a sample was taken. The "site" is user defined (e.g. it may be a building and its environs, a specific entity within an environment). Please use the same site ID for all samples from a given site, regardless of when these samples were taken. Any important changes in site location, should					
Database identifiers	sampling_site_ID	GENEPIO:0100760	samples are taken.	be represented with a new site ID. Store the ID for the event during which a sample	Site 12A		1.0.0	1.0.0	1.0.0
Database identifiers	sampling_event_ID	GENEPIO:0100761	The user-defined identifier assigned to a specific event during which one or more samples are taken, from one or more sites.	or samples were taken. For example, an event could be one person taking samples from multiple sites, or multiple people taking samples from one site.			1.0.0	1.0.0	1.0.0
Database identifiers	BioProject_accession	GENEPIO:0001136	The INSDC (i.e., ENA, NCBI, or DDBJ) accession number of the BioProject(s) to which the BioSample belongs.	Store the BioProject accession number. BioProjects are an organizing tool that links together raw sequence data, assemblies, and their associated metadata. Each province will be assigned a different bioproject accession number by the National Microbiology Lab. A valid NCBI BioProject accession has prefix PRJN e.g., PRJNA 12345, and is created once at the beginning of a new sequencing project.			1.0.0	1.0.0	1.0.0
Database identifiers	Ni-Garata acceptan	GENEPIO:0001139	The identifier assigned to a BioSample in INSDC (i.e., ENA, NCBI, or	Store the accession returned from the BioSample submission. NCBI BioSamples will have the prefix SAMN, ENA have the prefix SAMEA, DDBJ have SAMD	SAMN1418020 2, SAMD00000000		1.0.0	1.0.0	100
Database identifiers	BioSample_accession INSDC sequence read accession	GENEPIO:001139	DDBJ) archives. The identifier assigned to a sequence in one of the International Nucleotide Sequence Database Collaboration (INSDC) repositories.	SAMEA, DUSJ Nave SAMID Store the accession assigned to the submitted sequence. European Nucleotide Archive (ENA) sequence accessions start with ERR, NCBI-SRA accessions start with SRR, DNA Data Bank of Japan (DDBJ) accessions start with DRR and Genome Sequence Archive (GSA) accessions start with CRR.	ERR123456, DRR123456, CRR123456		1.0.0	1.0.0	1.0.0
Database identifiers	INSDC assembly accession	GENEPIO:0101204	The versioned identifier assigned to an assembly or consensus sequence in one of the International Nucleotide Sequence Database Collaboration (INSDC) repositories.	Store the versioned accession assigned to the submitted sequence e.g. the GenBank accession version.	LZ986655.1		1.0.0	1.0.0	1.0.0

Pathogen diagnostic testing	genetic target region	GENEPIO:0101117	or analysis.				1.0.0	1.0.0	1.0.0
			The reference representation and the determinant						
Pathogen diagnostic testing	genetic target region reference genome	GENEPIO:0101118	The reference genome version used to determine the coordinates or identity of the genetic target region in testing or analysis.				1.0.0	1.0.0	1.0.0
Pathogen diagnostic testing	diagnostic target presence	GENEPIO:0100962	The binary value of the result from a diagnostic test.	Select a value from the pick list provided, to describe whether a target was determined to be present or absent within a sample.	diagnostic target present		1.0.0	1.0.0	1.0.0
Pathogen diagnostic testing	diagnostic measurement value	GENEPIO:0100963	The value of the result from a diagnostic test.	Provide the numerical result of a diagnostic test (no need to include units).	1902-09-26		1.0.0	1.0.0	1.0.0
ogon diagnostic testing	gsub modela ontone value	32.121 10.0100300	or and result from a diagnostic test.		.552-65-26				
Delhaman diamandi i di		OFNESSO A CASA	The same of the sa	Select a value from the pick list provided, to	cycle threshold		400	100	100
Pathogen diagnostic testing	diagnostic measurement unit	GENEPIO:0100964	The unit of the result from a diagnostic test.	describe the units of the given diagnostic test.	(Ct)		1.0.0	1.0.0	1.0.0
				Select a value from the pick list provided to describe the method used for a given diagnostic					
Pathogen diagnostic testing	diagnostic measurement method	GENEPIO:0100965	The method by which a diagnostic result was determined.	test.	qPCR		1.0.0	1.0.0	1.0.0
Pathogen diagnostic testing	diagnostic testing threshold value	GENEPIO:0101104	The numerical value which represents the threshold above/below which interpretation can be drawn on the diagnostic test				1.0.0	1.0.0	1.0.0
Pathogen diagnostic testing	diagnostic testing threshold units	GENEPIO:0101105	The unit which are attributed to the threshold above/below which interpretation can be drawn on the diagnostic test				1.0.0	1.0.0	1.0.0

Parent Class	Field	Ontology Identifier	Definition	Guidance	Examples	Deprecated Label	Deprecated ID	Version Tracking		
Pathogen diagnostic testing	diagnostic testing details	GENEPIO:0101106	Describe any details of the diagnsotic testing.					1.0.0	1.0.0	1.0.0
	Risk assessment information	GENEPIO:0100478								
Risk assessment information	risk assessment imprimation prevalence_metrics	GENEPIO:0100478	Metrics regarding the prevalence of the pathogen of interest obtained from a surveillance project.	Risk assessment requires detailed information regarding the quantities of a pathogen in a specified location, commodify, or environment. As such, it is useful for risk assessors to know what types of information are available through documented methods and results. Provide the metric types that are available in the surveillance project sample plan by selecting them from the pick list. The metrics of interest are "Number of total samples collected," Number of positive samples," "Average count of hazard organism". You do not need to provide the actual values, just indicate that the information is available.				1.0.0	1.0.0	1.0.0
Risk assessment information	prevalence_metrics_details	GENEPIO:0100481	The details pertaining to the prevalence metrics from a surveillance project.	If there are details pertaining to samples or organism counts in the sample plan that might be informative, provide details using free text.	Hazard organism counts (i.e. Salmonella) do not distinguish between serovars.			1.0.0	1.0.0	1.0.0
Risk assessment information	stage_of_production	GENEPIO:0100482	The stage of food production.	Provide the stage of food production as free text.	Abattoir [ENVO:010009 25]			1.0.0	1.0.0	1.0.0
Risk assessment information	experimental_intervention	GENEPIO:0100483	The category of the experimental intervention applied in the food production system.	In some surveys, a particular intervention in the food supply chain in studied. If there was an intervention specified in the sample plan, select the intervention category from the pick list provided.	Vaccination [NCIT:C15346]			1.0.0	1.0.0	1.0.0
Risk assessment information	experiment_intervention_details	GENEPIO:0100484	The details of the experimental intervention applied in the food production system.	If an experimental intervention was applied in the survey, provide details in this field as free text.				1.0.0	1.0.0	1.0.0
